

Kayla de la Haye

Curriculum Vitae

September 2018

Business Address

Kayla de la Haye, Ph.D.

Department of Preventive Medicine

University of Southern California

2001 North Soto Street

Los Angeles, CA 90032

Phone: 1-323-442-8228

Email: delahaye@usc.edu

Citizenship: Canadian, Australian (U.S. Permanent Resident)

Personal Statement

In the past eight years of my research career, as Assistant Professor of Preventive Medicine at the University of Southern California, and previously as Behavioral/Social Scientist at the RAND Corporation, I developed an innovative program of research that merges health behavioral theory, social network analysis, and systems science, to generate new understandings of how social systems impact human health. Findings emerging from my research show that social networks and health behaviors evolve in mutually dependent ways: social selection based on similarities in attributes and behaviors create social groupings with particular social and behavioral norms, and these social groups subsequently shape and reinforce behavior in ways that have profound impacts on health and wellbeing. My current work is focused on developing health interventions that integrate social networks and systems science, as well as big data and mobile health technology, to promote healthy outcomes--in particular healthy eating and weight--in priority populations.

Education

Ph.D., Health Psychology, 2011

University of Adelaide, Adelaide, Australia

Concentrations: health psychology, social psychology, social network analysis

Dissertation: The role of friends in adolescent overweight and weight-related behaviours: A social network perspective

Supervisors: Prof. Carlene Wilson, Dr. Philip Mohr, Prof. Garry Robins

Bachelor of Health Science
(Hons), 2006

University of Adelaide, Adelaide, Australia

Concentrations: psychology

Thesis: Exploring physical activity, eating behaviours, and propensity for obesity, within an adolescent friendship network

Supervisors: Prof. Carlene Wilson

Bachelor of Arts, 2004

University of Adelaide, Adelaide, Australia

Concentrations: psychology, anthropology

Research Positions

2014 - current	<i>Assistant Professor of Preventive Medicine (tenure-track)</i> Keck School of Medicine, University of Southern California, Los Angeles, California Faculty at the Institute for Health Promotion & Disease Prevention Research, Department of Preventive Medicine; director of the USC Center for Applied Network Analysis (CANA); and affiliate faculty member of the USC mHealth Collaboratory and the USC Center for Artificial Intelligence in Society.
2010 - 2014	<i>Associate Behavioral / Social Scientist</i> RAND Corporation, Santa Monica, California Role: Researcher and social networks analyst working in health promotion, disease prevention, and social psychology. Member of the RAND Applied Network Analysis and Systems Science Research Group and RAND Obesity and Obesity Policy Research Group.
2009 - 2010	<i>Research Assistant</i> School of Medicine, Flinders University, Adelaide, Australia Role: Pilot research and grant proposal writing for the project 'Intergenerational Influences on Family Food Practices'.
2007 – 2009	<i>Research Assistant</i> CSIRO Food and Nutritional Sciences, Adelaide, Australia Role: Research assistant for the 'Older people, Omega-3, and Cognitive Health Trial'.
2005 – 2007	<i>Research Assistant</i> New Focus Research, Adelaide, Australia Role: Qualitative and quantitative market research for public and private sector clients.

Honors and Awards

2018	2018 Freeman Award, the International Network for Social Network Analysis (INSNA) bi-annual award for junior scholarship in the study of social structure
2014	Finalist (top 4), American Academy of Health Behavior Judith K. Black Early Career Research Award
2013	Brook Scholar Award, RAND Health, RAND Corporation
2011	University of Adelaide Doctoral Research Medal
2011	Franz Dalziel Prize for Thesis in Psychology, University of Adelaide
2011	Australian Psychological Society Award for Excellent Higher Degree Thesis in Health Psychology 2011
2007 - 2010	Australian Postgraduate Award, Australian Government (AUD \$73,500)
2007 - 2010	CSIRO Preventative Health Flagship Scholarship, Australia's Commonwealth Scientific and Industrial Research Organisation (AUD \$21,000)

Professional Affiliations

2017-current	Member, Society for Behavioral Medicine
2016-current	Board Member, International Network for Social Network Analysis
2015-2016	Member, International Society of Behavioral Nutrition and Physical Activity
2013-current	Full Member, American Academy of Health Behavior
2010-2016	Member, American Psychological Association, Division 8 (Society for Personality and Social Psychology)
2010-current	American Psychological Association, Division 38 (Health Psychology)
2008-current	Member, International Network for Social Network Analysis
2005-current	Member, Golden Key International Honor Society

Teaching

University of Southern California

2017(Fall)	PM501: Foundations in Health Education and Promotion Primary Instructor (4 units/60 hours), Masters of Public Health program
2017(Summer)	INTD 500: Responsible Conduct of Research Mentor (10 hours)
2016 (Fall)	PM501: Foundations in Health Education and Promotion Primary Instructor (4 units/60 hours), Masters of Public Health program
2016 (Spring)	HP430: Behavior and Education Strategies for Nutrition and Fitness Guest Lecture (1 hour)
2016 (Spring)	HP200: Introduction to Health Promotion and Disease Prevention Guest Lecture (1 hour)
2015 (Fall)	PM501: Foundations in Health Education and Promotion Primary Instructor (4 units/60 hours), Masters of Public Health program
2015 (Spring)	PM542: Social Network Analysis Guest Lecture (1 hour): <i>Introduction to Stochastic Actor-Based Models</i>
2015 (Spring)	PM501: Foundations in Health Education and Promotion Primary Instructor (4 units/60 hours), Masters of Public Health program
2014 (Fall)	PM601: Theory in Health Behavior Guest Lecture (1 hour): <i>Systems Science and Health</i>

Other Universities

2017 (Summer)	Lecturer, 4th Short Course: The Mathematical Sciences in Obesity The University of Alabama at Birmingham, Birmingham, USA
2007 – 2008	Teaching Assistant/Tutor, Psychological Research Methods II (Biostatistics) University of Adelaide, Adelaide, Australia
2007 (fall)	Teaching Assistant /Tutor, Psychology II University of Adelaide, Adelaide, Australia

Online Courses

2016	Systems Science and Obesity (Coursera) Course co-developer, Instructor: Social Networks and Obesity lecture Link to course , Produced by Johns Hopkins Global Obesity Prevention Center
------	---

Student & Postdoctoral Mentorship

Postdoctoral	Jennifer Labrecque (2015-2018) Postdoctoral Research Associate, University of Southern California Project: Network Science of Teams
Graduate (doctoral)	Sydney Miller (2018-), Ph.D. candidate, USC Department of Preventive Medicine Role: Primary advisor Ian Kim (2018-current), Ph.D. candidate, USC Department of Preventive Medicine Role: Dissertation committee member Jodie Stearns (2018), Ph.D. candidate, Dept. Kinesiology, Sport, and Recreation, University of Alberta, Canada Role: Dissertation exam committee member Suneal Kolluri (2018-current), Ph.D. candidate, USC Rossier School of Education Role: Qualifying exam and dissertation committee member Trevor Pickering (2018), Ph.D. candidate, USC Department of Preventive Medicine Role: Qualifying exam committee member Daniel Chu (2018), Ph.D. candidate, USC Department of Preventive Medicine Role: Qualifying exam committee member Xin-Zeng Wu (2016-2018), Ph.D. candidate, USC Viterbi School of Engineering Role: Qualifying exam & dissertation committee member Jaimie McGlashan (2016-2018), Ph.D. candidate, WHO Collaborating Center for Obesity Prevention, Deakin University, Melbourne, Australia Role: External advisor Brooke Bell (2016-current), Ph.D. candidate, USC Department of Preventive Medicine Role: Dissertation committee member Jennifer Marks (2013-2016), Ph.D. candidate, WHO Collaborating Center for Obesity Prevention, Deakin University, Melbourne, Australia Dissertation: Primary to secondary school, obesity, and friendships: A systems perspective Role: External associate advisor
Undergraduate	Directed Research trainees 2018: Stacey Lau, Rohan Martin, Ammarah Shaik, Priscilla Ring, Carrier Scherder, Karoline Schenosky, Payton Timmeney 2017: Carrier Scherder, Neda Salami, Raina Yusufova, Danielle Shabbouei 2016: Amos Adeleke, Kacie Klein, Jacqueline Anderson, Taylor Harris 2015: Aisha Vaiyani, Amirah Dales

W911NF1810243 (PI: de la Haye) 05/29/2018 - 05/28/2019
Army Research Office/DoD Defense University Research Instrumentation Program 0% effort

Observational System for Monitoring and Modeling Group Social Dynamics

This grant provides support for equipment to establish a new Group Social Dynamics Lab, which will house a state-of-the-art observational system to conduct both laboratory and field-based studies of social dynamics among groups and teams.

Role: Primary Investigator

Total Costs (annual): \$122,711

1R01HD092483-01 (PIs: de la Haye, Salvy) 09/01/2017 - 05/31/2022
NIH/NICHD 25% effort

In-Home Obesity Prevention to Reach Low-Income Infants Through Maternal and Social Transmission

This study capitalizes on the strengths and interests of established Home Visitation Programs, which serve at-risk, low-income, diverse mothers and their infants, to test a weekly, in-home evidence-based childhood obesity prevention model delivered in the first 2 years of children's life. This project represents a unique opportunity to test an innovative model of primary childhood obesity prevention that targets important maternal and social network mechanisms.

Role: Primary Investigator (contact PI)

Total Costs (annual): \$599,782

R01HD084606 (PI: Gesell / USC Site PI: de la Haye) 02/18/2016 - 01/31/2019

Building Social Networks to Improve Physical Activity and Weight Loss in Latino Parents

This project examines the complex relationship between social networks and peer influences on Latino adult physical activity and obesity in order to understand which types of networks facilitate (and which constrain) the diffusion of physical activity and weight loss through a community.

Role: Co-Investigator (USC Site PI)

Total Costs (annual): \$213,565

APP1114118 (PI: Allender) 02/01/16-01/31/19
National Health and Medical Research Council

Whole of Systems Trial of Prevention Strategies for Childhood Obesity: WHO STOPS Childhood Obesity

This project aims to: 1) strengthen community action for childhood obesity prevention; and, 2) measure the impacts of increased action on risk factors for childhood obesity by working with local partners to embed best practice for obesity prevention into existing community systems (e.g. health, workplaces, local council, schools).

Role: Associate Investigator

Total Costs (annual): AUD \$1,204,688

IIS-1521740 (PI: Spruijt-Metz) 09/01/15 - 08/30/19
National Science Foundation 10% effort

Monitoring and Modeling Family Eating Dynamics (M2FED)

This project proposes M2FED – an integrated system of in-home beacons, wireless and wearable sensors, and smartphones that provide ongoing, synchronized real-time data on in-home eating behaviors and theory-based process variables. This rich data will be aggregated to generate real-time contextual FED models using systems networks models. Key activities that precede target behaviors will be identified in order to develop and optimize future just-in-time, adaptive interventions.

Role: Co-Primary Investigator

Total Costs (annual): \$425,000

Research Support: Active (cont.)

QUANTA: Quantitative Network-based Models of Adaptive Team Behavior

The multidisciplinary, multi-institutional team will utilize expertise in cognitive and behavioral science, sociology, computer science, and network science to generate multilevel, dynamic models of teams and social groups that effectively explain various dimensions of group performance. The resulting conceptual and statistical models that relate group composition, interaction patterns, and network evolution to task performance, will break new ground in understanding the optimal design of teams for complex tasks.

Role: Co-Primary Investigator

Total Costs (annual): \$1,253,000

Research Support: Past (select)

NIH/National Cancer Institute 10% effort

The Global Diffusion of Tobacco Control

This study compiles extensive network data from GLOBALink, an electronic forum for global tobacco advocacy, to construct multiple social networks used to estimate network effects in a dynamic modeling framework. We study network influences on the diffusion and adoption of the Framework Convention for Tobacco Control.

Role: Co-Investigator

Total Direct Costs (annual): \$320,000

W911NF-16-1-0066 (PI: de la Haye) 02/01/16-01/31/17
